

Contents

Electronic Noses

- A new generation of integrated electronic noses. 223
P.I. Neaves, J.V. Hatfield (Manchester, UK)
- Application of neural-network systems to the dynamic response of polymer-based sensor arrays. 232
M. Schweizer-Berberich, J. Göppert, A. Hierlemann, J. Mitrovics, U. Weimar, W. Rosenstiel, W. Göpel (Tübingen, Germany)
- A self-organizing system for pattern classification: time varying statistics and sensor drift effects 237
C.D. Natale, F.A.M. Davide, A. D'Amico (Rome, Italy)
- A fast and reproducible method for gas sensor screening to flavour compounds 242
B. Hivert, M. Hoummady (Besançon, France), P. Mielle, G. Mauvais (Dijon, France), J.M. Henrioud, D. Hauden (Besançon, France)
- Identification of paper quality using a hybrid electronic nose 246
M. Holmberg, F. Winquist, I. Lundström (Linköping, Sweden), J.W. Gardner, E.L. Hines (Coventry, UK)
- Application of a multi-gas-sensor device in the meat industry for boar-taint detection 250
B. Bourrounet, T. Talou, A. Gaset (Toulouse, France)
- The development of an electronic 'nose' for industrial and environmental applications. 255
D. Hodgins (Takeley, near Bishops Stortford, Herts., UK)

Smart Gas Sensors

- Intelligent gas sensing using an integrated sensor pair. 261
J.W. Gardner (Coventry, UK)
- Improvement in signal evaluation methods for semiconductor gas sensors. 267
H.-E. Endres, W. Göttler, H.D. Jander, S.M. Drost, H. Sandmaier (Munich, Germany), G. Sberveglieri, G. Faglia, C. Perego (Brescia, Italy)
- Smart chemical sensing arrays using tin oxide sensors and analog winner-take-all signal processing. 271
D. Bednarczyk, S.P. DeWeerth (Atlanta, GA, USA)
- Dynamic calibration of QMB polymer-coated sensors by Wiener kernel estimation 275
F.A.M. Davide, C.D. Natale, A. D'Amico (Rome, Italy), A. Hierlemann, J. Mitrovics, M. Schweizer, U. Weimar, W. Göpel (Tübingen, Germany), S. Marco, A. Pardo (Barcelona, Spain)
- Compensation of the influence of humidity on the measurement of an SO₂ sensor by signal processing 286
J. Pichlmaier (Neubiberg, Germany)
- Qualitative and quantitative gas analysis with non-linear interdigital sensor arrays and artificial neural networks. 289
G. Niebling, A. Schlachter (Munich, Germany)
- A piezoelectric oxygen transducer based on paramagnetic properties: the TOPP sensor 293
E. Martin, O. Ingremau, M. Corazza, M. Billon (Lannion, France)
- Thick film pellistor array with a neural network post-treatment 297
H. Debéda, D. Rebière, J. Pistré, F. Ménil (Talence, France)

Humidity Sensors

- New concept of integrated Peltier cooling device for the preventive detection of water condensation 303
P. Ancey, M. Gschwind (Sophia Antipolis, France), O. Vancauwenberghe (Noisy-le-Grand, France)
- In situ formation of humidity-sensitive devices for the evaluation of solar panel encapsulations 308
G. Huyberegts, L. Frisson (Leuven, Belgium)

Effect of electrode alterations on the a.c. behaviour of $\text{Li}_2\text{O-ZnO}$ humidity sensors.	312
M.E.V. Costa, P.Q. Mantas, J.L. Baptista (Aveiro, Portugal)	
Surface acoustic wave (SAW) dew point sensor: application to dew point hygrometry	315
M. Hoummady, C. Bonjour, J. Collin, F. Lardet-Vieudrin, G. Martin (Besançon, France)	
ISFETs	
Application of simple thioether ionophores to silver ion-selective CHEMFETs	321
A. Errachid, J. Bausells, A. Merlos, J. Esteve, F. Teixidor, C. Pérez-Jiménez, J. Casabó, C. Jiménez, J. Bartroli (Bellaterra, Barcelona, Spain)	
Ion-sensitive field-effect transistors with ultrathin Langmuir-Blodgett membranes.	325
M.J. Schöning, M. Sauke, A. Steffen, M. Marso, P. Kordos, H. Lüth (Jülich, Germany), F. Kauffmann, R. Erbach, B. Hoffmann (Karlsruhe, Germany)	
Sensitive membrane ISFETs for nitrate analysis in waters	329
L. Campanella, C. Colapicchioni, G. Crescentini, M.P. Sammartino, Y. Su, M. Tomassetti (Rome, Italy)	
Application of nickel electroless plating to the fabrication of low-cost backside contact ISFETs.	336
A. Merlos, J. Esteve, M.C. Acero, C. Cané, J. Bausells (Bellaterra, Barcelona, Spain)	
Development of a pH-sensitive ISFET suitable for the fabrication in a volume production environment	341
A. Garde, J. Alderman, W. Lane (Cork, Ireland)	
Investigation of the dynamic response behaviour of ISFET pH sensors by means of laser Doppler velocimetry (LDV)	345
W. Oelßner, J. Zosel, F. Berthold, H. Kaden (Meinsberg, Germany)	
Potentiometric Electrochemical Sensors	
Spectroscopic studies of chalcogenide glass membranes of chemical sensors: local structure and ionic response	351
E. Bychkov (St. Petersburg, Russia)	
Electrochemical microsensor for the detection of Na^+ ions	360
A. Guessous, J. Sarradin, P. Papet, A. Pradel, M. Ribes (Montpellier, France)	
Characterization of the oxygen electrode reaction on stabilized zirconia at temperatures below 550 K	364
S. Linquette Mailley, E. Djurado (Saint-Martin-d'Hères, France), G. Mairesse (Villeneuve d'Ascq, France), J. Fouletier (Saint-Martin-d'Hères, France)	
The nitrate-selective sensor with crystalline membrane	369
Yu.E. Ermolenko, V.V. Kolodnikov, S. Al-Marok, Yu.G. Vlasov (St. Petersburg, Russia)	
Ion-selective electrodes based on <i>p</i> -1-adamantylcalix[8]arene ionophores for the determination of amino compounds	372
N.V. Shvedene, M.Yu. Nemilova, V.V. Kovalev, E.A. Shokova, A.K. Rozov, I.V. Pletnev (Moscow, Russia)	
Development and analytical evaluation of a multisensor system for water quality monitoring.	377
A.V. Legin, E.A. Bychkov, B.L. Seleznev, Yu.G. Vlasov (St. Petersburg, Russia)	
Instrument with integrated sensors for a rapid determination of inorganic ions	380
B. Roß, G. Steiner, M. Kiesshauer, M. Bradter, K. Cammann (Münster, Germany)	
Copper(II)-ion response of Cu-As-Se thin-film sensors in a flow-through microcell	384
E. Bychkov, M. Bruns, H. Klewe-Nebenius, G. Pfennig, K. Raptis, W. Hoffmann, H.J. Ache (Karlsruhe, Germany)	
Amperometric Electrochemical Sensors	
Amperometric electrochemical device for remote detection of degradation of fire-resistant fluid lubricants.	391
M. Perdicakis, M. Sadik, J. Bessière (Villers-les-Nancy, France)	
Highly sensitive electrochemical microsensors using submicrometer electrode arrays.	394
M. Paeschke, U. Wollenberger, T. Lisec, U. Schnakenberg, R. Hintsche (Berlin, Germany)	
Amperometric microelectrode array in containment technology.	398
H. Hinkers, C. Sundermeir (Münster, Germany), R. Lürick, F. Walfort (Steinfurt, Germany), K. Cammann, M. Knoll (Münster, Germany)	
Electrochemical oxygen microsensors	401
M. Dilhan, D. Estève, A.M. Gué (Toulouse, France), O. Mauvais, L. Mercier (Blagnac, France)	
Electrochemical Sensors Based on Impedance Measurement	
Use of amorphous silicon thin layers as an electrical transducer in an ion electrochemical sensor	407
P. Fabry, E. Siebert (Saint-Martin D'Hères, France), J.C. Bruyère, P. Muret (Grenoble, France)	

Dielectric control of the behaviour of ion-exchange resins	411
J. Bessière, A. Kléber, I. Sutapa, M. Perdicakis (Villers-les-Nancy, France)	
Enzyme Biosensors	
Contribution of biosensors to oenology and constraints associated with their use	417
M. Gilis, M. Comtat (Toulouse, France)	
Glucose sensor based on an amperometric microelectrode with a photopolymerizable enzyme membrane	421
C. Jiménez, J. Bartolí (Bellaterra, Barcelona, Spain), N.F. de Rooij, M. Koudelka-Hep (Neuchâtel, Switzerland)	
Amperometric enzyme/gas-diffusion electrodes	425
A. Kaisheva, I. Iliev, R. Kazareva, S. Christov (Sofia, Bulgaria)	
Determination of urea in blood serum by a urease biosensor based on an ion-sensitive field-effect transistor	429
O.A. Boubriak, A.P. Soldatkin, N.F. Starodub, A.K. Sandrovsky, A.K. El'skaya (Kiev, Ukraine)	
The effect of divalent metal ions on the performance of a glucose-sensitive ENFET using potassium ferricyanide as an oxidising substrate	432
A.A. Shul'ga (Münster, Germany), M. Koudelka-Hep, N.F. de Rooij (Neuchâtel, Switzerland)	
Design of a choline sensor via direct coating of the transducer by photopolymerization of the sensing layer	436
B. Leca, R.M. Morelis, P.R. Coulet (Villeurbanne, France)	
Comparison of the performances of two bi-enzymatic sensors for the detection of D-lactate	440
M. Montagné (Perpignan, France), H. Erdmann (Braunschweig, Germany), M. Comtat (Toulouse, France), J.-L. Marty (Perpignan, France)	
Biosensors for Medical and Environmental Applications	
A comparison of three fluorophores for use in an optical biosensor for the measurement of prostate-specific antigen in whole blood	447
P.B. Daniels, J.E. Fletcher, P.M. O'Neill, C.G. Stafford, T. Bacarese-Hamilton, G.A. Robinson (Woking, Surrey, UK)	
A shear-horizontal acoustic plate mode (SH-APM) sensor for biological media	452
C. Déjous, M. Savart, D. Rebière, J. Pistré (Talence, France)	
Impedance analysis of Si/SiO ₂ structures grafted with biomolecules for the elaboration of an immunosensor	457
C. Schyberg, C. Plossu, D. Barbier (Villeurbanne, France), N. Jaffrezic-Renault, C. Martelet, H. Maupas, E. Souteyrand (Ecully, France), M.-H. Charles, T. Delair, B. Mandrand (Lyon, France)	
A multi-sensor system for the non-invasive measurement of the activity of the autonomic nervous system	461
A. Dittmar, H. Rada, G. Delhomme (Lyon, France), E. Vernet-Maury, C. Collet, R. Roure, R. Unterreiner, M. Robini (Villeurbanne, France), C. Delemer (Aix-en-Provence, France)	
Continuous monitoring of sodium concentration in blood during haemodialysis by a selective membrane and conductivity sensor	465
F. Montiel, P. Aimar (Toulouse, France), P. Montoriol (Fourquevaux, France)	
Electric-field-mediated inhibition of cell and microparticle adhesion: a new way to create bio-repellent surfaces	468
G. Fuhr, A. Voigt, T. Müller, B. Wagner, K. Reimer, T. Lisec (Berlin, Germany)	
Chemical microsensor systems for medical applications in catheters	471
R. Hintsche, Ch. Kruse, A. Uhlig, M. Paeschke, T. Lisec, U. Schnakenberg, B. Wagner (Berlin, Germany)	
Monitoring of antibody-antigen reactions with affinity sensors: experiments and models	474
M. Klein (Ulm/Donau, Germany), R. Kates, N. Chucholowski, M. Schmitt (Munich, Germany), C. Lyden (Cork, Ireland)	
Immobilization of thylakoids in polyvinylalcohol for the detection of herbicides	477
R. Rouillon (Perpignan, France), M. Sole, R. Carpentier (Trois-Rivières, Que., Canada), J.-L. Marty (Perpignan, France)	
Author Index Volumes B26 and B27	480
Subject Index Volumes B26 and B27	483

The publisher encourages the submission of articles in electronic form thus saving time and avoiding rekeying errors. A leaflet describing our requirements is available from the publisher upon request.
